

## A new way to access addiction treatment for Hampshire's criminal justice service users.

From 1 April 2011, the way in which criminal justice service users access drug and alcohol treatment services in Hampshire will be changing.

The Society of St James, in partnership with Hampshire Probation Trust, will commence delivery of the Hampshire Integrated Offender Management Service, which replaces the existing DIP and PPO Services, across the Hampshire County Council area.

This new service will be responsible for the co-ordination of a range of interventions designed to assist those within criminal justice services to reduce their offending and aid their recovery from drug and alcohol dependency. It will also assist this client group to access housing services, education, training and employment plus a range of additional 'wrap around' services in order to 'Break the Cycle' of their offending behaviour.

The service will be delivered from the locations listed below, as well as a number of 'satellite' sites such as Probation offices and drug treatment providers - HOMER.
